Myotest cracks the biomechanic code like many other fitness tech companies right now, it knows smart, dynamic coaching is the future of this.

Cambridge scientists in global consortium spell out the 3bn letters of the genome, 50 years on from Crick and Watson's model of DNA.

For the time being, if it truly has cracked the code, Myotest could have something highly valuable to offer the wearables market in its biomechanic brains. It may be happening, as we find out in a new installment of Cracking the Code. All of us have lurking in our DNA a most remarkable gene, which has a crucial job – it protects us from cancer. Wehopehealthcareproviderswilltakepart,too,addingtheirownpricelist even with powerful tools, tiny stretches of the human genome still cannot be deciphered.
