What do my test results mean? Journal of Clinical Immunology. This test looks at 3 types of lymphocytes to see how well your immune system is working. In addition, prostate cancer tumors can evade CD8 cell recognition due to their ability to downregulate expression of MHC class 1 molecules. These attack foreign cells, Killer Lymphocytes cells, and cells infected with a virus. By using this site, you agree to the Terms of Use and Privacy Policy. T cell responses such as dynamic expansion and contraction of subsets, increased 'killing' activity was established across a wide variety of species, and the existence of a separate lineage of cells possessing this ability was postulated.
