The Crain and Crain study builds on three earlier versions that also found enormous regulatory costs. Over million people are out of work in the G20 countries, with joblessness at historically high levels in several of. Changes to the services system will strengthen the incentives for providers to deliver high quality assistance by refocusing payments on employment outcomes, setting clear expectations for jobseekers and improving the support available to employers. In every single year benefit exceeded costs, consistent with the general trend. Crain and Crain also find that regulations are costly to the economy; their study is examined in the last section of this report. As we will discuss, in practice, measuring relative policy stringency across different forms of regulation and enforcement regimes is far from straightforward. More recently, Gray and Shadbegian found a link between higher pollution-abatement in countries with higher costs will then lose market share to competitors in countries producing pollution-intensive exports more cheaply.
