Yet they are so in fundamentally different ways. The theoretical background is set out in an entirely new and substantial introduction, which also provides a comprehensive and systematic review of developments in cognitive and social anthropology since as these have impacted on classification studies. Few anthropologists today realize the pioneering role Margaret Mead played in the investigation of contemporary cultures.

He is well-known for his early work on India, which culminated in *Homo Hierarchicus*. What has been gained by using existential perspectives in your fieldwork and writing? Well written, good reading.

More practically, the volume offers teachers and students the possibility of new forms of state power that are emerging are not reducible to the past, and the nation-state, as the essays in this volume show, is giving way to a political-economic formation that has multiple state-like effects and is able to act in ways systemic with deterritorializing global processes.
