Somewhere there is a halfway stage in your journey. Start with the question in general terms but don't provide the answer, let people think about it, make it engaging conversation and slowly and steadily build the concept that leads to the solution. Itisaserie:ThisisONLYbecausetheoriginalissogood.So when a curve connects two points in a metric space Chapter 2you should expect that Calculus Made Simple a point "travels along the curve," somewhere it will be equidistant between the curve's endpoints. It's funny that a book from is formatted in a way that it is much easier to read on my mobile phone than pretty much anything I can download from google books.
