Vision Research, 34, – Retrieved 5 March Retrieved from "https: Even if the camera is just rotated, its point of view may move accidentally if the camera is not rotated about the correct point. Looks like the person is hanging by the fingertips when he is actually lying on a flat ground. A downpour created in-studio Forced Perspective much of the viewer's attention away from the backdrop and extras, making the simulated perspective less noticeable.

Few pictures look so real, that it makes us forget that it is forced perspective. Forced perspective is extensively employed at theme parks and other such architecture as found in Disneyland and Las Vegas. Forced Perspective, often to make structures seem larger than they are in reality where physically larger structures would not be feasible or desirable, or to otherwise provide an optical illusion for entertainment value. The subtended angle increases as the object moves closer to the lens.
